Set-Up Instructions for mvnLite on Windows

Conda/Python
https://www.anaconda.com/products/individual

Open Anaconda Prompt

conda create -n mvn
Enter 'y' when prompted.
conda activate mvn

Clone Repository
https://github.com/Ryan-A-Armstrong/mvnLite
Open the download code option and choose "Download ZIP"

Extract the ZIP.

Open the folder and rename "mvnLite-master" to "mvnLite"

Move "mvnLite" to a place of your choosing. You can now delete the ZIP and the parent folder ("mvnLite-master")

Install Requirements
conda activate mvn
cd ..\path\to\mvnLite
pip install -r requirements.txt
